

## THERMOPLAN B&W4 COMPACT CTM2 + RS

Outstanding coffee quality at the touch of a button. Compact Swiss made modularity.

### FEATURES + BENEFITS

- Compact in size without compromise – the Black&White 4c is the world's most compact bean-to-cup machine at this level of performance – 154mm slimmer than its nearest competitor. It's simple to use, delivers consistently exceptional coffee, all while having a footprint the size of an A4 piece of paper.
- Clever modularity – all functions are set up in two front-end exchangeable modules. Maintenance work is performed exclusively on these, minimising downtime and engineer time on site.
- Barista-level micro-foam – an exceptional espresso deserves consistent, stable and perfectly textured milk. It's guaranteed thanks to adjustable micro-foam settings. The patented milk technology delivers without the requirement for an annual Pressure Vessel Inspection.
- Key features – built in fridge, 13amp power supply, Pressure Vessel Inspection not required, made in Switzerland, automated cleaning process and exchangeable module system.

### KEY STATISTICS

| **Product:** Coffee. Tea. Milk

| **Power (watts):** 2800

| **Milk:** Auto

**Product code:** 9224

**THERMOPLAN**
